1 Macros

Here's a list of macros defined in macros.tex:

1.1 Brackets

$$\backslash\mathrm{pa}\{x\} = (x) \quad (1a)$$

$$\backslash\mathrm{cro}\{x\} = [x] \quad (1b)$$

$$\backslash\mathrm{bra}\{x\} = \{x\} \quad (1c)$$

$$\backslash\mathrm{abs}\{x\} = |x| \quad (1d)$$

1.2 Nabla

$$\backslash\mathrm{vecnabla} = \nabla \quad (2a)$$

$$\backslash\mathrm{laplacien}\{A\} = \nabla^2 A \quad (2b)$$

$$\backslash\mathrm{laplacent}\{A\} = \nabla_{\perp}^2 A \quad (2c)$$

$$\backslash\mathrm{gradient}\{A\} = \nabla A \quad (2d)$$

$$\backslash\mathrm{grad}\{A\} = \nabla A \quad (2e)$$

$$\backslash\mathrm{divergence}\{vB\} = \nabla \cdot \mathbf{B} \quad (2f)$$

$$\backslash\mathrm{rotationnel}\{vB\} = \nabla \times \mathbf{B} \quad (2g)$$

1.3 Differential operators

$$\backslash\mathrm{delx}\{y\} = \frac{\partial y}{\partial x} \quad (3a)$$

$$\backslash\mathrm{dely}\{x\} = \frac{\partial x}{\partial y} \quad (3b)$$

$$\backslash\mathrm{delz}\{y\} = \frac{\partial y}{\partial z} \quad (3c)$$

$$\backslash\mathrm{delr}\{x\} = \frac{\partial x}{\partial r} \quad (3d)$$

$$\backslash\mathrm{delt}\{y\} = \frac{\partial y}{\partial t} \quad (3e)$$

$$\backslash\mathrm{deli}\{x\}\{y\} = \frac{\partial x}{\partial y} \quad (3f)$$

$$\backslash\mathrm{delxs}\{y\} = \frac{\partial^2 y}{\partial x^2} \quad (4a)$$

$$\backslash\mathrm{delys}\{x\} = \frac{\partial^2 x}{\partial y^2} \quad (4b)$$

$$\backslash\mathrm{delzs}\{y\} = \frac{\partial^2 y}{\partial z^2} \quad (4c)$$

$$\backslash\mathrm{delts}\{x\} = \frac{\partial^2 x}{\partial t^2} \quad (4d)$$

$$\backslash\mathrm{delis}\{x\}\{y\} = \frac{\partial^2 x}{\partial y^2} \quad (4e)$$

$$\backslash\mathrm{dx}\{y\} = \frac{dy}{dx} \quad (5a)$$

$$\backslash\mathrm{dy}\{x\} = \frac{dx}{dy} \quad (5b)$$

$$\backslash\mathrm{dz}\{y\} = \frac{dy}{dz} \quad (5c)$$

$$\backslash\mathrm{di}\{x\}\{y\} = \frac{dx}{dy} \quad (5d)$$

$$\backslash\mathrm{dxs}\{y\} = \frac{d^2 y}{dx^2} \quad (6a)$$

$$\backslash\mathrm{dys}\{x\} = \frac{d^2 x}{dy^2} \quad (6b)$$

$$\backslash\mathrm{dzs}\{y\} = \frac{d^2 y}{dz^2} \quad (6c)$$

$$\backslash\mathrm{dis}\{x\}\{y\} = \frac{d^2 x}{dy^2} \quad (6d)$$

$$\backslash\mathrm{dtreal}\{y\} = \frac{dy}{dt} \quad (7a)$$

$$\backslash\mathrm{dtsreal}\{x\} = \frac{d^2 x}{dt^2} \quad (7b)$$

$$\backslash\mathrm{dt}\{y\} = \dot{y} \quad (7c)$$

$$\backslash\mathrm{dts}\{x\} = \ddot{x} \quad (7d)$$

1.4 Functions

$$\backslash\mathrm{erf}\{x\} = \mathrm{erf}\{x\} \quad (8a)$$

$$\backslash\mathrm{ex}\{x\} = \exp\{x\} \quad (8b)$$

$$\backslash\mathrm{ep}\{x\} = e^{(x)} \quad (8c)$$

$$\backslash\mathrm{e}\{x\} = e^x \quad (8d)$$

$$\backslash\mathrm{ln}\{x\} = \ln x \quad (8e)$$

$$\backslash\mathrm{log}\{x\} = \log x \quad (8f)$$

$$\backslash\mathrm{lnp}\{x\} = \ln(x) \quad (8g)$$

$$\backslash\mathrm{logp}\{x\} = \log(x) \quad (8h)$$

$$\backslash\mathrm{cosinus}\{x\} = \cos x \quad (8i)$$

$$\backslash\mathrm{cosp}\{x\} = \cos(x) \quad (8j)$$

$$\backslash\mathrm{cosine}\{x\} = \cos x \quad (8k)$$

$$\backslash\mathrm{sinp}\{x\} = \sin(x) \quad (8l)$$

$$\backslash\mathrm{sinus}\{x\} = \sin x \quad (8m)$$

$$\backslash\mathrm{sine}\{x\} = \sin x \quad (8n)$$

$$\backslash\mathrm{sinec}\{x\} = \mathrm{sinc}(x) \quad (8o)$$

$$\backslash\mathrm{sinecsquared}\{x\} = \mathrm{sinc}^2(x) \quad (8p)$$

$$\backslash\mathrm{cossquared}\{x\} = \cos^2 x \quad (8q)$$

$$\backslash\mathrm{sinsquared}\{x\} = \sin^2 x \quad (8r)$$

$$\backslash\mathrm{cosinesquared}\{x\} = \cos^2 x \quad (8s)$$

$$\backslash\mathrm{sinesquared}\{x\} = \sin^2 x \quad (8t)$$

$$\backslash\mathrm{acos}\{x\} = \mathrm{acos}(x) \quad (8u)$$

$$\backslash\mathrm{asin}\{x\} = \mathrm{asin}(x) \quad (8v)$$

$$\backslash\mathrm{atan}\{x\} = \mathrm{atan}(x) \quad (8w)$$

$$\backslash\mathrm{sech}\{x\} = \mathrm{sech}(x) \quad (8x)$$

$$\backslash\mathrm{tanh}\{x\} = \tanh x \quad (8y)$$

$$\backslash\mathrm{sechsquared}\{x\} = \mathrm{sech}^2(x) \quad (8z)$$

1.5 Physical constants

$$\backslash\text{epsz} = \epsilon_0 \quad (9a)$$

$$\backslash\text{epsr} = \epsilon_r \quad (9b)$$

$$\backslash\text{muz} = \mu_0 \quad (9c)$$

$$\backslash\text{om} = \omega \quad (9d)$$

$$\backslash\text{omi}\{2\} = \omega_2 \quad (9e)$$

$$\backslash\text{omegaz} = \omega_0 \quad (9f)$$

$$\backslash\text{omegasquared} = \omega^2 \quad (9g)$$

$$\backslash\text{omegazsquared} = \omega_0^2 \quad (9h)$$

$$\backslash\text{omegazsquaredomegasquared} = \omega_0^2 - \omega^2 \quad (9i)$$

$$\backslash\text{chiun} = \chi^{(1)} \quad (9j)$$

$$\backslash\text{chideux} = \chi^{(2)} \quad (9k)$$

$$\backslash\text{chitrois} = \chi^{(3)} \quad (9l)$$

1.6 Vectors

$$\backslash\text{ve}\{A\} = \mathbf{A} \quad (10a)$$

$$\backslash\text{vE} = \mathbf{E} \quad (10b)$$

$$\backslash\text{vA} = \mathbf{A} \quad (10c)$$

$$\backslash\text{vB} = \mathbf{B} \quad (10d)$$

$$\backslash\text{vF} = \mathbf{F} \quad (10e)$$

$$\backslash\text{vP} = \mathbf{P} \quad (10f)$$

$$\backslash\text{vS} = \mathbf{S} \quad (10g)$$

$$\backslash \mathbf{va} = \mathbf{a} \quad (11\mathbf{a})$$

$$\backslash \mathbf{vb} = \mathbf{b} \quad (11\mathbf{b})$$

$$\backslash \mathbf{vc} = \mathbf{c} \quad (11\mathbf{c})$$

$$\backslash \mathbf{vd} = \mathbf{d} \quad (11\mathbf{d})$$

$$\backslash \mathbf{vee} = \mathbf{e} \quad (11\mathbf{e})$$

$$\backslash \mathbf{vf} = \mathbf{f} \quad (11\mathbf{f})$$

$$\backslash \mathbf{vg} = \mathbf{g} \quad (11\mathbf{g})$$

$$\backslash \mathbf{vh} = \mathbf{h} \quad (11\mathbf{h})$$

$$\backslash \mathbf{vi} = \mathbf{i} \quad (11\mathbf{i})$$

$$\backslash \mathbf{vj} = \mathbf{j} \quad (11\mathbf{j})$$

$$\backslash \mathbf{vk} = \mathbf{k} \quad (11\mathbf{k})$$

$$\backslash \mathbf{vl} = \mathbf{l} \quad (11\mathbf{l})$$

$$\backslash \mathbf{vm} = \mathbf{m} \quad (11\mathbf{m})$$

$$\backslash \mathbf{vp} = \mathbf{p} \quad (11\mathbf{n})$$

$$\backslash \mathbf{vq} = \mathbf{q} \quad (11\mathbf{o})$$

$$\backslash \mathbf{vr} = \mathbf{r} \quad (11\mathbf{p})$$

$$\backslash \mathbf{vqd} = \mathbf{\dot{q}} \quad (11\mathbf{q})$$

$$\backslash \mathbf{vv} = \mathbf{v} \quad (11\mathbf{r})$$

$$\backslash \mathbf{vt} = \mathbf{t} \quad (11\mathbf{s})$$

$$\backslash \mathbf{vx} = \mathbf{x} \quad (11\mathbf{t})$$

$$\backslash \mathbf{vz} = \mathbf{z} \quad (11\mathbf{u})$$

1.6.1 Vectors omega

$$\backslash \mathbf{vEo} = \mathbf{E}_{\omega} \quad (12\mathbf{a})$$

$$\backslash \mathbf{vEto} = \mathbf{E}_{2\omega} \quad (12\mathbf{b})$$

$$\backslash \mathbf{vPo} = \mathbf{P}_{\omega} \quad (12\mathbf{c})$$

$$\backslash \mathbf{vPto} = \mathbf{P}_{2\omega} \quad (12\mathbf{d})$$

1.7 Hat

$$\backslash\mathrm{hvp} = \hat{\mathbf{p}} \quad (13\mathrm{a})$$

$$\backslash\mathrm{hvx} = \hat{\mathbf{x}} \quad (13\mathrm{b})$$

$$\backslash\mathrm{hvy} = \hat{\mathbf{y}} \quad (13\mathrm{c})$$

$$\backslash\mathrm{hvu} = \hat{\mathbf{u}} \quad (13\mathrm{d})$$

$$\backslash\mathrm{hvx} = \hat{\mathbf{x}} \quad (13\mathrm{e})$$

$$\backslash\mathrm{hvy} = \hat{\mathbf{y}} \quad (13\mathrm{f})$$

$$\backslash\mathrm{hvx} = \hat{\mathbf{x}} \quad (13\mathrm{g})$$

$$\backslash\mathrm{hvtheta} = \hat{\theta} \quad (13\mathrm{h})$$

$$\backslash\mathrm{hvphi} = \hat{\phi} \quad (13\mathrm{i})$$

1.8 Tilde

$$\backslash\mathrm{tilde}\{x\} = \tilde{x} \quad (14\mathrm{a})$$

$$\backslash\mathrm{tE} = \tilde{E} \quad (14\mathrm{b})$$

$$\backslash\mathrm{tP} = \tilde{P} \quad (14\mathrm{c})$$

$$\backslash\mathrm{tvE} = \tilde{\mathbf{E}} \quad (14\mathrm{d})$$

$$\backslash\mathrm{tvP} = \tilde{\mathbf{P}} \quad (14\mathrm{e})$$

$$\backslash\mathrm{tA} = \tilde{A} \quad (14\mathrm{f})$$

$$\backslash\mathrm{tvA} = \tilde{\mathbf{A}} \quad (14\mathrm{g})$$

1.9 Random

$$\backslash\mathrm{mum} = \mu\mathrm{m} \quad (15)$$

$$\backslash\mathrm{dix}\{3\} = \times 10^3 \quad (16)$$

$$\backslash\mathrm{vmu} = \boldsymbol{\mu} \quad (17)$$

$$\backslash\mathrm{vDelta} = \boldsymbol{\Delta} \quad (18)$$

1.9.1 Inside text

`\schrodinger`: Schrödinger

Figure 1: This is a caption

2 Other useful information

See also the *The Not So Short Introduction to L^AT_EX 2_ε* [1] available online at <http://tobi.oetiker.ch/lshort/lshort.pdf> or <http://www.ctan.org/tex-archive/info/lshort/english/lshort.pdf>.

2.1 Example functions

$$F(x) = \int_0^\infty \frac{\sqrt{a+x}}{(b+x)^5} dx \quad (19)$$

2.2 Citing

When a label is attached to an equation, it can be cited. By adding “\label{eqn:example}” in the function’s *align* environment, it becomes possible to cite equation (19) with “\eqref{eqn:example}”.

To reference a book, article or other, use `BIBTEX`. Then cite the document using its `BIBTEXkey` with “\cite{BibTeX key}”. For example, “\cite{Taflove2005}” will give the clickable link [2] which points to the references section.

2.3 Figures

Figures should be in PDF or PNG format if compiling using `pdflatex` or EPS if compiling with `latex` (resulting in a DVI file).

Since PDF is a vectorial format, figures in PDF will give higher quality results (if the figure is in vectorial format that is). Figure 1 shows an example.

2.4 Greek alphabet

Code	Result	Code	Result	Code	Result	Code	Result
<code>\alpha</code>	α	<code>\mu</code>	μ	<code>\chi</code>	χ	<code>\Sigma</code>	Σ
<code>\beta</code>	β	<code>\nu</code>	ν	<code>\psi</code>	ψ	<code>\varSigma</code>	Σ
<code>\gamma</code>	γ	<code>\xi</code>	ξ	<code>\omega</code>	ω	<code>\Upsilon</code>	Υ
<code>\delta</code>	δ	<code>\pi</code>	π	<code>\Gamma</code>	Γ	<code>\varUpsilon</code>	Υ
